INDEX TO SUBJECTS

ABSORPTION, antibody, antigenic analysis of group B arthropod-borne viruses by, 21
Acid, ribonucleic, from virulent and attenuated poliovirus, biological properties, 525
—, ribonucleic, in virus synthesis, 5,6-dichloro-1-β-D-ribofuranosylbenzimidazole, 339
— ribonucleic, in virus synthesis, studies with ribonuclease, 351
Agglutinating antibodies, demonstration against guinea pig complement fixed on sensitized sheep erythrocytes, 93
Agglutinins, specific, against certain components of guinea pig complement fixed on sensitized sheep erythrocytes, 107
Allergenic and toxic properties of fractions of methanol extracts of tubercle bacilli as antituberculous vaccine, 369
"Allergic" encephalomyelitis, suppression by encephalitogenic proteins extracted from homologous brain, 171
— encephalomyelitis, transfer by lymph node cells, 119
— reactions, specificity, delayed *versus* Arthus hypersensitivity, 465
Anaphylaxis, reticulo-endothelial system tested with homologous antibody-antigen complexes, 631
Angiotensin, immunologic production and detection of antiangiotensin, 429
Angiotensin-protein complex antigen, and immunologic production of antiangiotensin, 419
Antiangiotensin, immunologic production and detection, 429
—, immunologic production, preparation of angiotensin-protein complex antigen, 419
Antibodies, agglutinating, against guinea pig complement fixed on sensitized sheep erythrocytes, 93
— to penicillin, development, 611
Antibody absorption, antigenic analysis of group B arthropod-borne viruses by, 21
— formation by peritoneal exudate cells *in vitro*, 573
Antibody-antigen complexes, homologous, reticulo-endothelial system in anaphylaxis tested with, 631
— complexes, soluble, pathologic effects of intravenously administered, acute glomerulonephritis, 195
— complexes, soluble, pathologic effects of intravenously administered, passive serum sickness, 181
Antigen, angiotensin-protein complex, and immunologic production of antiangiotensin, 419
Antigen-antibody complexes, homologous, reticulo-endothelial system in anaphylaxis tested with, 631
— complexes, soluble, pathologic effects of intravenously administered, acute glomerulonephritis, 195
— complexes, soluble, pathologic effects of intravenously administered, passive serum sickness, 181
Antigenic analysis of group B arthro-

pod-borne viruses by antibody absorption, 21
Antigenic properties of complement, analysis of specific agglutinins against components of guinea pig complement fixed on sensitized sheep erythrocytes, 107
— properties of complement, demonstration of agglutinating antibodies against guinea pig complement fixed on sensitized sheep erythrocytes, 93
Antituberculous vaccine, toxic and allergenic properties of fractions of methanol extracts of tubercle bacilli as, 369
Arthropod-borne viruses, group B, antigenic analysis by antibody absorption, 21
Arthus *versus* delayed hypersensitivity, specificity of allergic reactions, 465
Auxotrophic mutants of HeLa cells, method of selecting, 559

BACILLI, tubercle, fractions of methanol extracts of, toxic and allergenic properties of as antituberculous vaccine, 369
Bacterial endotoxin, accelerated cutaneous reactivity to, Shwartzman phenomenon, 761
— endotoxin, passive transfer of tolerance to pyrogenicity of, 453
Benzimidazole, 5,6 - dichloro - 1 - β - D-ribofuranosyl-, studies with, ribonucleic acid in virus synthesis, 339
Biological properties of ribonucleic acid from virulent and attenuated poliovirus, 525
Blood group substances A and B in man, histological distribution, 785
Botulism, size of toxic particle passing intestinal barrier in, 745
Brain, homologous, suppression of "allergic" encephalomyelitis by encephalitogenic proteins extracted from, 171

CARBOHYDRATE variants from cultures of HeLa and conjunctival cells, genetic study of human cells *in vitro*, 235
Cartilage, effects of papain and vitamin A on, 705
—, effects of papain and vitamin A on organ cultures of embryonic skeletal tissue, 719
Cell-fixed component, inactivation by complement reagents, 77
Cells, HeLa, method of selecting auxotrophic mutants of, 559
—, human, genetic study *in vitro*, carbohydrate variants from cultures of HeLa and conjunctival cells, 235
— *in vitro*, peritoneal, antibody formation by, 573
—, lymph node, transfer of allergic encephalomyelitis by, 119
Cerebral ventricles, production of lesions by introduction of toxin into, pathogenesis of dysentery intoxication, 145
Chemical characterization of leucocytic pyrogen in pathogenesis of fever, 831
—, immunocyto-, study of γ-globulin in liver in hepatitis and postnecrotic cirrhosis, 285
Cirrhosis, postnecrotic, and hepatitis, immunocytochemical study of γ-globulin in liver in, 285
Complement, antigenic properties, analysis of specific agglutinins against components of guinea pig complement fixed on sensitized sheep erythrocytes, 107
—, antigenic properties, demonstration of agglutinating antibodies against guinea pig complement fixed on sensitized sheep erythrocytes, 93
—, first component of, and sensitized

erythrocytes, preparation of stable and highly reactive complex of, 77
Complement reagents, inactivation of cell-fixed component by, 77
— system, relation of β_1-glycoprotein of human serum to, 217
Conjunctival and HeLa cells, carbohydrate variants from cultures of genetic study of human cells *in vitro*, 235
Cryptococcosis, specific and nonspecific immunity in, 643
Cultures of HeLa and conjunctival cells, carbohydrate variants, genetic study of human cells *in vitro*, 235
—, organ, of embryonic skeletal tissue, effects of papain and vitamin A on, 719
Curvature of distal foreleg, hereditary, genetic and pathological aspects, 823
— of distal foreleg, hereditary, genetic studies of bowing deformity, 801
Cutaneous reactivity to bacterial endotoxins, accelerated, Shwartzman phenomenon, 761
Cytochemical, immuno-, study of γ-globulin in liver in hepatitis and postnecrotic cirrhosis, 285

DEER, *Odocoileus virginianus*, virus-induced epizootic hemorrhagic disease of, 155
Deformity, bowing, genetic studies in hereditary distal foreleg curvature, 801
Dichloro - 1 - β - D - ribofuranosylbenzimidazole, 5,6-, studies with, ribonucleic acid in virus synthesis, 339
Disease, hemorrhagic, epizootic, of *Odocoileus virginianus*, virus-induced, 155
Dysentery intoxication, pathogenesis, production of lesions by introduction of toxin into cerebral ventricles, 145

EAR chambers injured by heat, relationship of fibrinogen and fibrin to leucocytic sticking reaction in, 45
Eggs, embryonate, effects of x-rays and beta rays (tritium) on growth of *Rickettsia mooseri* and *Rickettsia akari* in, 841
Embryonate eggs, effects of x-rays and beta rays (tritium) on growth of *Rickettsia mooseri* and *Rickettsia akari* in, 841
Embryonic skeletal tissue, organ cultures, effects of papain and vitamin A on, 719
Encephalitogenic proteins extracted from homologous brain, suppression of "allergic" encephalomyelitis by, 171
Encephalomyelitis, "allergic," suppression by encephalitogenic proteins extracted from homologous brain, 171
—, allergic, transfer by lymph node cells, 119
Endotoxic activity in skin, titrating, 1
Endotoxin, bacterial, passive transfer of tolerance to pyrogenicity of, 453
—, lipopolysaccharide, influence on functional and metabolic properties of polymorphonuclear leucocytes, 689
Endotoxins, bacterial, accelerated cutaneous reactivity, Shwartzman phenomenon, 761
Epizootic hemorrhagic disease of *Odocoileus virginianus*, virus-induced, 155
Erythrocytes, sensitized, and first component of complement, preparation of stable and highly reactive complex of, 77
—, sensitized sheep, agglutinating antibodies against guinea pig complement fixed on, 93
—, sensitized sheep, specific agglutinins against components of guinea pig complement fixed on, 107

Exotoxins, immunologic, related to scarlet fever toxins, pyrogenic and other effects in host-parasite factors in Group A streptococcal infections, 255
Extracts, methanol, of tubercle bacilli, toxic and allergenic properties of fractions employed as antituberculous vaccine, 369
Exudate cells *in vitro*, peritoneal, antibody formation by, 573

FEVER, pathogenesis, chemical characterization of leucocytic pyrogen, 831
—, scarlet. *See* Scarlet fever.
Fibrin and fibrinogen, relationship to leucocytic sticking reaction in ear chambers injured by heat, 45
Fibrinogen and fibrin, relationship to leucocytic sticking reaction in ear chambers injured by heat, 45
Fixation of complement on sensitized sheep erythrocytes, demonstration of agglutinating antibodies against, 93
— of component by cell, inactivation by complement reagents, 77
Flora, intestinal, effect on growth rate and susceptibility to infections, 407
Furanosylbenzimidazole, 5,6-dichloro-l-β-D-ribo-, studies with, ribonucleic acid in virus synthesis, 339

GENETIC and pathological aspects of hereditary distal foreleg curvature, 823
— studies of bowing deformity, hereditary distal foreleg curvature, 801
— studies of influenza viruses, viral morphology and growth capacity as exchangeable genetic traits, 387
— study of human cell *in vitro*, carbohydrate variants from cultures of HeLa and conjunctival cells, 235
Globulin, γ-, in liver in hepatitis and postnecrotic cirrhosis, immunocytochemical study, 285
Glomerulonephritis, acute, pathologic effects of intravenously administered soluble antigen-antibody complexes, 195
Glycoproteins β_1-, of human serum, isolation and characterization, 201
— β_1-, of human serum, relation to complement system, 217
Growth and susceptibility to infections, effect of intestinal flora, 407

HEAT injury, relationship of fibrinogen and fibrin to leucocytic sticking reaction in ear chambers, 45
HeLa cells, method of selecting auxotrophic mutants of, 559
— and conjunctival cells, carbohydrate variants from cultures of, genetic study of human cells *in vitro*, 235
Hemolysis, immune, 77
Hemorrhagic disease, epizootic, of *Odocoileus virginianus*, virus-induced, 155
Hepatitis and postnecrotic cirrhosis, immunocytochemical study of γ-globulin in liver in, 285
Hereditary distal foreleg curvature, genetic and pathological aspects, 823
— distal foreleg curvature, genetic studies of bowing deformity, 801
— premature senescence, acute form, 505
— premature senescence, chronic form, 485
Histological distribution of blood group substances A and B in man, 785
Homologous antibody-antigen complexes reticulo-endothelial system in anaphylaxis tested with, 631
— brain, suppression of "allergic"

encephalomyelitis by encephalitogenic proteins extracted from, 171
Host-parasite factors in Group A streptococcal infections, pyrogenic and other effects of immunologic exotoxins related to scarlet fever toxins, 255
Hypersensitivity, delayed *versus* Arthus, specificity of allergic reactions, 465

IMMUNE hemolysis, 77
Immunity, non-specific, opsonins in, 137
—, specific and non-specific in cryptococcosis, 643
Immunocytochemical study of γ-globulin in liver in hepatitis and postnecrotic cirrhosis, 285
Immunologic cross-reactions among mammalian acute phase proteins, 441
— exotoxins related to scarlet fever toxins, pyrogenic and other effects in host-parasite factors in Group A streptococcal infections, 255
— production and detection of antiangiotensin, 429
— production of antiangiotensin, preparation of angiotensin-protein complex antigen, 419
— specificity of Type II pneumococcus and its separation into partial specificities, 33
— studies on C polysaccharide complex of Group A streptococci having toxic effect on connective tissue, 295
Infection following ionizing radiation, susceptibility, 773
—, polyoma virus, relation to lymphocytic neoplasms, 517
Infections, host-parasite factors in Group A streptococcal infections, pyrogenic and other effects of immunologic exotoxins related to scarlet fever toxins, 255
—, susceptibility to, and growth, effect of intestinal flora on, 407
Inflammation, acute, pathogenesis of, 45
Influenza viruses, genetic, viral morphology and growth capacity as exchangeable genetic traits, 387
Ingestion, particle, requirements and consequences, functional and metabolic properties of polymorphonuclear leucocytes, 667
Injection, intraperitoneal and intravenous, following different doses of x-radiation, susceptibility to infection following ionizing radiation, 773
—, intravenously administered soluble antigen-antibody complexes, pathologic effects, acute glomerulonephritis, 195
—, intravenously administered soluble antigen-antibody complexes, pathologic effects, passive serum sickness, 181
Intestinal barrier in botulism, size of toxic particle passing, 745
— flora, effect on growth rate and susceptibility to infections, 407
Intoxication, dysentery, pathogenesis, production of lesions by introduction of toxin into cerebral ventricles, 145
Ionizing radiation, susceptibility to infection following, 773
Irradiation, effect on acute phase protein system in Cx-reactive protein, 601

LESIONS, production by introduction of toxin into cerebral ventricles, pathogenesis of dysentery intoxication, 145
Leucocytes, human, behavior of staphylococci within, 533
—, polymorphonuclear, functional and metabolic properties, influence of lipopolysaccharide endotoxin, 689

Leucocytes, polymorphonuclear, functional and metabolic properties, requirements and consequences of particle ingestion, 667
—, polymorphonuclear, *in vitro*, phagocytosis of Group A streptococci by, 309
Leucocytic pyrogen, chemical characterization in pathogenesis of fever, 831
—, sticking reaction in ear chambers injured by heat, relationship of fibrinogen and fibrin to, 45
Lipopolysaccharide endotoxin, influence on functional and metabolic properties of polymorphonuclear leucocytes, 689
Liver in hepatitis and postnecrotic cirrhosis, γ-globulin in, immunocytochemical study, 285
Lymph node cells, transfer of allergic encephalomyelitis in rats by, 119
Lymphocytic neoplasms, relation of polyoma virus infection to, 517

MAMMALIAN acute phase proteins, immunologic cross-reactions among, 441
Man cells *in vitro*, genetic study, carbohydrate variants from cultures of HeLa and conjunctival cells, 235
—, histological distribution of blood group substances A and B in, 785
— leucocytes, behavior of staphylococci within, 533
— serum, isolation and characterization of β_1-glycoproteins of, 201
— serum, relation of β_1-glycoprotein to complement system, 217
Metabolic and functional properties of polymorphonuclear leucocytes, influence of lipopolysaccharide endotoxin, 689
— and functional properties of polymorphonuclear leucocytes, requirements and consequences of particle ingestion, 667
Methanol extracts of tubercle bacilli, toxic and allergenic properties as antituberculous vaccine, 369
Morphology, viral, and growth capacity as exchangeable genetic traits, in genetic studies of influenza viruses, 387
Mutants, auxotrophic, of HeLa cells, method of selecting, 559
Myoglobin, binding by plasma protein, 65

NECROTIC cirrhosis, post-, and hepatitis, immunocytochemical study of γ-globulin in liver in, 285
Neoplasms, lymphocytic, relation of polyoma virus infection to, 517
Nephritis, glomerulo-, acute, pathologic effects of intravenously administered soluble antigen-antibody complexes, 195
Node, lymph. *See* Lymph.
Nuclease, ribo-, in studies of ribonucleic acid in virus synthesis, 351
Nucleic acid, ribo-, from virulent and attenuated poliovirus, biological properties, 525
— acid, ribo-, in virus synthesis, studies with 5,6-dichloro-1-β-D-ribofuranosylbenzimidazole, 339
— acid, ribo-, in virus synthesis, studies with ribonuclease, 351

ODOCOILEUS *virginianus*, virus-induced epizootic hemorrhagic disease of, 155
Opsonins in non-specific immunity, 137
Organ cultures of embryonic skeletal tissue, effects of papain and vitamin A on, 719

PAPAIN and vitamin A effects on cartilage, 705
— and vitamin A effects on organ

cultures of embryonic skeletal tissue, 719
Parasite-host factors in Group A streptococcal infections, pyrogenic and other effects of immunologic exotoxins related to scarlet fever toxins, 255
Pathogenesis of acute inflammation. 45
— of dysentery intoxication, production of lesions by introduction of toxin into cerebral ventricles, 145
— of fever, chemical characterization of leucocytic pyrogen, 831
Pathologic effects of intravenously administered soluble antigen-antibody complexes, acute glomerulonephritis, 195
— effects of intravenously administered soluble antigen-antibody complexes, passive serum sickness, 181
— and genetic aspects of hereditary distal foreleg curvature, 823
Penicillin, antibodies to, development, 611
Peritoneal exudate cells *in vitro*, antibody formation by, 573
Phagocytin, preparation and properties, 323
Phagocytosis of Group A streptococci by polymorphonuclear leucocytes *in vitro*, 309
Plasma protein binding myoglobin, 65
Pneumococcus, Type II, immunological specificity and its separation into partial specificities, 33
Poliomyelitis virus, virulent and attenuated, biological properties of ribonucleic acid from, 525
Polymorphonuclear leucocytes, functional and metabolic properties, influence of lipopolysaccharide endotoxin, 689
— leucocytes, functional and metabolic properties, requirements and consequences of particle ingestion, 667
Polymorphonuclear leucocytes *in vitro*, phagocytosis of Group A streptococci by, 309
Polyoma virus infection, relation to lymphocytic neoplasms, 517
Polysaccharide complex, C, of Group A streptococci having toxic effect on connective tissue, immunological studies, 295
—, lipo-, endotoxin, influence on functional and metabolic properties of polymorphonuclear leucocytes, 689
Polysaccharides of Group D streptococci, type and group, 621
Protein, Cx-reactive, effect of irradiation on acute phase protein system, 601
—, β_1-glyco-, of human serum, relation to complement system, 217
—, plasma, binding myoglobin, 65
Protein-angiotensin complex antigen, immunologic production of anti-angiotensin, 419
Proteins, encephalitogenic, extracted from homologous brain, suppression of "allergic" encephalomyelitis by, 171
—, β_1-glyco-, of human serum, isolation and characterization, 201
—, mammalian acute phase, immunologic cross-reactions among, 441
Pyrogen, leucocytic, chemical characterization in pathogenesis of fever, 831
Pyrogenic and other effects of immunologic exotoxins related to scarlet fever toxins, host-parasite factors in Group A streptococcal infections, 255
Pyrogenicity of bacterial endotoxin, passive transfer of tolerance to, 453

RADIATION, beta (tritium), and x-rays, effects on growth of *Rickettsia mooseri* and *Rickettsia akari* in embryonate eggs, 841

Radiation, ionizing, susceptibility to infection, intraperitoneal and intravenous injection at intervals following different doses of x-radiation, 773
Reactions, allergic, specificity, delayed *versus* Arthus hypersensitivity, 465
Reactivity, accelerated, cutaneous, to bacterial endotoxins, Shwartzman phenomenon, 761
Reagents, complement, inactivation of cell-fixed component by, 77
Reticulo-endothelial system in anaphylaxis, tested with homologous antibody-antigen complexes, 631
Ribofuranosylbenzimidazole, 5,6-dichloro-1-β-D, studies with, ribonucleic acid in virus synthesis, 339
Ribonuclease, in studies of ribonucleic acid in virus synthesis, 351
Ribonucleic acid from virulent and attenuated poliovirus, biological properties, 525
— acid in virus synthesis, studies with 5, 6-dichloro-1-β-D-ribofuranosylbenzimidazole, 339
— acid in virus synthesis, studies with ribonuclease, 351
Rickettsia mooseri and *Rickettsia akari* in embryonate eggs, effects of x-rays and beta rays (tritium), 841

SCARLET fever toxins, pyrogenic and other effects of immunologic exotoxins related to, host-parasite factors in Group A streptococcal infections, 255
Senescence, hereditary premature, acute form, 505
—, hereditary premature, chronic form, 485
Sensitized erythrocytes and first component of complement, preparation of stable and highly reactive complex of, 77
Sensitized sheep erythrocytes, agglutinating antibodies against guinea pig complement fixed on, 93
— sheep erythrocytes, specific agglutinins against components of guinea pig complement fixed on, 107
Serum, human, isolation and characterization of two β_1-glycoproteins of, 201
—, human, relation of β_1-glycoprotein to complement system, 217
— sickness, passive, pathologic effects of intravenously administered soluble antigen-antibody complexes, 181
Shwartzman phenomenon, accelerated cutaneous reactivity to bacterial endotoxins, 761
Sickness, passive serum, pathologic effects of intravenously administered soluble antigen-antibody complexes, 181
Skeletal tissue, embryonic, effects of papain and vitamin A on organ cultures of, 719
Skin, titrating endotoxic activity in, 1
Soluble antigen-antibody complexes intravenously administered, pathologic effects, acute glomerulonephritis, 195
— antigen-antibody complexes intravenously administered, pathologic effects, passive serum sickness, 181
Specific agglutinins against components of guinea pig complement fixed on sensitized sheep erythrocytes, 107
—, non-, immunity, opsonins in, 137
— and non-specific immunity in cryptococcosis, 643
Specificity, immunological, of Type II pneumococcus and its separation into partial specificities, 33
— of allergic reactions, delayed *versus* Arthus hypersensitivity, 465

Staphylococci within human leucocytes, behavior, 533
Streptococcal infections, Group A, host-parasite factors, pyrogenic and other effects of immunologic exotoxins related to scarlet fever toxins, 255
—, C polysaccharide complex of Group A, having toxic effect on connective tissue, immunological studies, 295
—, Group D, type and group polysaccharides, 621
—, phagocytosis of Group A by polymorphonuclear leucocytes *in vitro*, 309
Susceptibility to infection following ionizing radiation, 773
— to infections and growth, effect of intestinal flora, 407

TISSUE, connective, immunological studies on C polysaccharide complex of Group A streptococci having toxic effect on, 295
—, embryonic skeletal, effects of papain and vitamin A on organ cultures of, 719
Titrating endotoxic activity in skin, 1
Toxic and allergenic properties of fractions of methanol extracts of tubercle bacilli as antituberculous vaccine, 369
— effect on connective tissue, immunological studies on C polysaccharide complex of Group A streptococci having, 295
— particle passing intestinal barrier in botulism, 745
Toxin introduced into cerebral ventricles, lesions produced by, pathogenesis of dysentery intoxication, 145
Toxins, scarlet fever, pyrogenic and other effects of immunologic exotoxins related to, host-parasite factors in Group A streptococcal infection, 255
Transfer of allergic encephalomyelitis by lymph node cells, 119
—, passive, of tolerance to pyrogenicity of bacterial endotoxin, 453
Tritium, beta rays, and x-rays, effects on growth of *Rickettsia mooseri* and *Rickettsia akari* in embryonate eggs, 841
Tubercle bacilli, fractions of methanol extracts of, toxic and allergenic properties of as antituberculous vaccine, 369

VACCINE, antituberculous, toxic and allergenic properties of fractions of methanol extracts of tubercle bacilli as, 369
Ventricles, cerebral, production of lesions by introduction of toxin into, pathogenesis of dysentery intoxication, 145
Virulent and attenuated poliovirus, biological properties of ribonucleic acid from, 525
Virus infection, polyoma, relation to lymphocytic neoplasms, 517
—, poliomyelitis, virulent and attenuated, biological properties of ribonucleic acid from, 525
— synthesis, ribonucleic acid in, studies with 5,6 - dichloro - 1 - β-D-ribofuranosylbenzimidazole, 339
— synthesis, ribonucleic acid in, studies with ribonuclease, 351
Viruses, group B arthropod-borne, antigenic analysis by antibody absorption, 21
—, influenza, genetic studies, viral morphology and growth capacity as exchangeable genetic traits, 387
Virus-induced epizootic hemorrhagic disease of *Odocoileus virginianus*, 155
Vitamin A and papain effects on cartilage, 705
— A and papain effects on organ cultures of embryonic skeletal tissue, 719

X-RAY and beta rays (tritium), effects on growth of *Rickettsia mooseri* and *Rickettsia akari* in embryonate eggs, 841

CONTENTS

No. 1, January 1, 1960
